

## Unità di controllo URS e DG Control unit URS and DG

FOTOLETTRICI / PHOTOELECTRIC

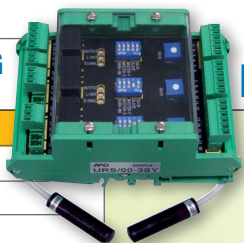

INDUTTIVI / PROXIMITY

SICUREZZA / SAFETY

AREA / AREA

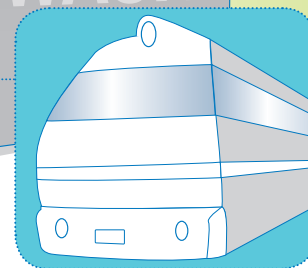

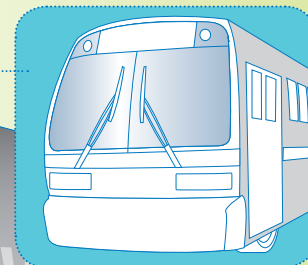

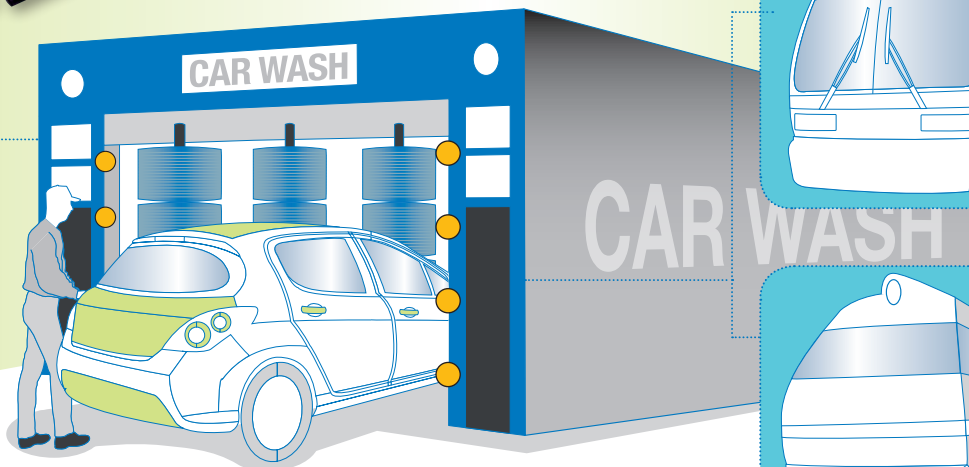

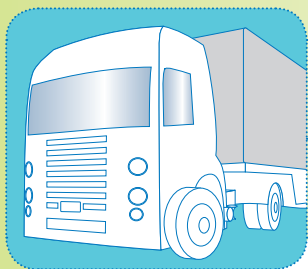

CAPACITIVI / CAPACITIVES

ULTRASONICI / ULTRASONIC

## Ideale per autolavaggi, tunnel e portali automatizzati

*Ideal for car applications, washing-drying tunnels and truck and train wash*

MD Micro Detectors introduce sul mercato il nuovo **modulo di controllo** serie **URS** per sensori ottici di grande potenza. Il modulo è disponibile in versioni a 3 ed a 1 canale, è immune ad interferenze ed ammette la **connessione fino a 14 sensori indipendenti in serie**. I sensori a barriera serie **DG**, con grado di protezione **IP68** e **portata** fino a **75m**, permettono di **attraversare i getti d'acqua ad alta pressione per un'ottimale salvaguardia del veicolo**.

**MD. Sensori al servizio dell'automazione.**

MD Micro Detectors introduces on the market the new **URS series control unit** for optical sensors of high power. The unit is available in 3 and 1 channel versions, it is protected against interferences and admits the **connection in series, up to 14 independent sensors**. The **DG series through beams** with a **IP68** protection degree, with **sensing distance up to 75m** can guarantee the **perfect reading through high pressure water jets under ensuring optimal protection of the vehicle**.

**MD. Sensors serving industrial automation.**
